Subject Index to Volume 11

ABC transporters
canalicular multidrug resistance protein as 509
hepatobiliary 19
ACTH-dependent transcription: of bovine steroid hydroxylase genes 419
Actin polymerization: Paraquat and 261
Adenosine deaminase deficiency: gene therapy for, in neonates 635
Adenosine triphosphate metabolism: bile canalicular membrane and 101
Adenoviral vectors 615
chimeric 624
Adenylosuccinate lyase: in affinity labeling 217
Adenylosuccinate synthetase: in affinity labeling 217
S-Adenyosylmethionine transporter: in African trypanosomiasis 256
Adipocyte: regulatory function of 743
Adipose tissue
leptin gene expression in at birth 382
tumor necrosis factor and 743
AdoMet: as S-adenyosylmethionine transporter in African trypanosomiasis 256
Adrenocorticotropic hormone: in steroid hydroxylase gene transcription 419
Adriamycin: cardiotoxicity of, pathophysiology and prevention of 931
Aequorin: in measurement of $[Ca^{2+}]$ in intact cells 881
Aerobic glycolysis: by proliferating cells, in protection against oxidative stress 388
Affinity cleavage: isocitrate dehydrogenase in 217
Affinity labeling 217
African trypanosomiasis: S-adenyosylmethionine transporter in 256
Aging
CD4 memory T cells and 775
DNA damage and repair and 322
muscle changes in, caloric restriction and 573
AIDS. *See* Human immunodeficiency virus (HIV) infection
Aldose reductase: induction of by oxidative stress 181
α-factor receptor: ubiquitination of 1215
Alternative promoter usage: in estrogen biosynthesis 29
Alzheimer's disease: amyloid plaque formation in 817
American Association of Anatomists: symposia 300
American Physiological Society: symposia 294
American Society for Investigative Pathology: symposia 299
American Society for Nutritional Sciences: symposia 300
American Society of Biochemistry and Molecular Biology: symposia 712
Amino acids: degradation of, in mammalian cells 526
D-Amino acids: in immune phenomena 449
Amino acid transport: in muscle cells, phosphatidylinositol 3-kinase in 1111
Amino-terminal fragment of urokinase: cytotoxicity of 1169
db-cAMP: in vascular smooth muscle differentiation 905
β-Amyloid peptide: electrospray ionization mass spectrometry of 817
Anaplastic lymphoma kinase: and cellular proliferation and oncogene up-regulation in rat fibroblasts 965
Androgen-dependent expression of prolactin: in prostate epithelium 1297
Androgen: in sulfotransferase regulation 109
Angiogenesis
cellular and molecular regulation in 365
and chronic inflammation 457
thymosin β_4 and 474
Angiopoietins: in vascular development 365
Anorexia: tumor necrosis factor and 743
Anti-DNA antibodies: in systemic lupus erythematosus 1033
Antioxidants
for Adriamycin cardiotoxicity 931
impairment of excitatory amino acid transporter activity and 154
Apoptosis 141
Bax-dependent pathways for, in *Xenopus* tadpole tail muscles 801
daunorubicin-triggered, serine protease inhibitors and 695
neutrophilic, β_2 integrins in 1177
nitric oxide-mediated, cyclooxygenase-2 in 887
of serotonergic cells
MDMA (ecstasy) and 141
in signal transduction, calmodulin-dependent protein kinase II mediation of 843
thyroid hormone–induced, inhibition of by cyclosporin A but not FK506 559
APS-kinase: in 3′-phosphoadenosine 5′-phosphosulfate regulation of 404
Aromatase cytochrome P450: expression of, alternative promoter usage in 29
Aromatase *(CYP19)* gene: expression of, promoters for 29
Arrestin mRNA: retinoic acid regulation of 271
D-[^{3}H]Asparatate: uptake of, oxidative stress and 154
Aspartyl protease cathepsin D: in breast cancer cell invasion 785
Asphyxia: perinatal, decreased heart protein kinase C and cyclin-dependent kinase in 482
Atherogenesis
autoimmune 1199
hyperhomocysteinemia in 1157
Atherosclerosis
autoimmunity and 1199
hyperhomocysteinemia and 703
MDC 15 in 173
molecular epidemiology of 1021
oxidative stress induced by low-density lipoproteins in 1317
ATP binding cassette transporters: canalicular multidrug resistance protein as 509
ATP metabolism: bile canalicular membrane and 101
ATP-sulfurylase: 3′-phosphoadenosine 5′-phosphosulfate regulation of 404
Autoimmunity: atherosclerosis and 1199

***Bax*-dependent pathways:** for apoptosis, in tadpole tail muscles 801
B cells: Mel_{1a}-melatonin receptor mRNA in 466
bcl-2 overexpression: in breast cancer 947
Bergmann glial cells: kainate-triggered Ca^{2+} signaling in, Na^+/Ca^{2+} exchanger and 566
β_2 integrins: in neutrophilic apoptosis 1177
Bile acid transport, across hepatic canalicular membrane 199
conjugate export pump in 509
Bile canalicular membrane. *See* Hepatocyte canalicular membrane
Bile salts: membrane transport of, mdr2 P-glycoprotein in 19
Biomedical research
government funding for 305
in Germany 505
Blood-brain barrier: in vitro model of 1187
Bone marrow transplantation: gene marking studies after 640
Bradykinin: chimeric analogs of, design strategies for 582
BRCT domain superfamily: in cell cycle checkpoint proteins 68
Breast cancer
aspartyl protease cathepsin D and 785
bcl-2 overexpression and 947
research directions in 535

$[Ca^{2+}]$ microdomains: agonist-induced Ca^{2+} release in HeLa cells and 881
Ca^{2+} regulation of in nucleus 1091
Cachexia
plasma cystine levels and 84
tumor necrosis factor and 743
Calcium channel currents: protein tyrosine kinase and 859
Calcium mobilization: in natural killer cells, interferon-inducible protein 10 and lymphotactin induction of 765
Calcium signaling
kainate-triggered, in Bergmann glial cells, Na^+/Ca^{2+} exchanger and 566
in nucleus 1091
Calibrated quantitative polymerase chain reaction: target length and primer concentration in 879
Calmodulin-dependent protein kinase II: in signal transduction in apoptosis 843
Calmodulin: hematopoietins and 37
Calmodulin recognition: sequence motifs for 331
Caloric restriction: reduced age-related changes in muscle and 573
Canalicular membrane. *See* Hepatocyte canalicular membrane
Canalicular multidrug resistance protein (cMRP): conjugate export pump encoded by 509
Cancer
breast
aspartyl protease cathepsin D and 785
bcl-2 overexpression and 947
research directions in 535
colon, NSAID prophylaxis for, prostaglandin H synthase and 234
DNA vaccines for 753
electromagnetic fields and 1127
environmental causes of, misconceptions about 1041
hematological, gene therapy for 640
hepatocellular
genomic imprinting in 60

multidrug resistance in 308
p53 deficiency and 591
muscle wasting in, cysteine and glutathione in 1077
NSAID prophylaxis for, prostaglandin H synthase and 234
Cancer cachexia
plasma cystine levels and 84
tumor necrosis factor and 743
Carcinogenesis
electromagnetic fields and 1127
genomic imprinting in 60
nitric oxide and p53 tumor suppressor gene interaction in 443
Carcinogens: environmental, misconceptions about 1041
Cardiac glycogen turnover and glucose uptake: epinephrine and 973
Cardiac protein kinase C: decrease in, in perinatal asphyxia 482
Cardiomyocytes: embryonic, 3-D reconstitution of 683
Cardiomyopathy: chagasic, IgG interaction with heart muscarinic acetylcholine receptor in 77
Cardiotoxicity: of Adriamycin, pathophysiology and prevention of 931
CD4 memory T cells: longevity and 775
CD10
in thymic development 376, 1003
in thymopentin-induced cell proliferation 1003
CD 10/NEP: in phorbol ester–induced growth arrest in Jurkat T cells 869
Cell cycle checkpoint proteins BRCT domain superfamily in 68
Cell signaling
growth factor, extracellular matrix in 51
sphingolipids and glycerolipids in 45
c-erbB2 amplicons: calibrated quantitative PCR for 897
c-fos: homocysteine induction of 703
CHAK cells: chemotaxis and calcium mobilization in, interferon-inducible protein 10 and lymphotactin induction of 765
Chemotaxis: in natural killer cells, interferon-inducible protein 10 and lymphotactin induction of 765
Chimeric adenoviral/retroviral vectors 624
Chimeric peptides: design strategies for 582
Cholesterol: membrane transport of, mdr2 P-glycoprotein in 19
Choline sulfate: plant, biochemistry and molecular biology of 517
Chondrodysplasias
matrix component abnormalities and 125
transcription factors and signaling pathways in 125
Chromosomal localization: in cytosolic sulfotransferases 3
Chronic inflammation: angiogenesis and 457
Classical conditioning: plasma cortisol changes induced by dexamethasone in 1291
cMRP: conjugate export pump encoded by 509
c-myb: homocysteine induction of 703
Colon cancer: NSAID prophylaxis for, prostaglandin H synthase and 234
Combinatorial peptide library: in determination of helical epitopes 147
Conjugate export pump: for hepatic canalicular transport 509
Connectin/titin: structure and function of 341
Cryoelectron microscopy: of viral capsids 733
Cyclin-dependent kinase: decrease in, in perinatal asphyxia 482
Cyclohexamide: in ACTH-dependent transcription of steroid hydroxylase genes 419
Cyclooxygenase-2: in nitric oxide-mediated apoptosis 887
Cyclosporin A: in inhibition of thyroid hormone–induced apoptosis 559
***CYP19* (aromatase) gene:** expression of, promoters for 29
Cysteine: in muscle wasting diseases 1077
Cysteine residues: in *S. cerevisiae* proteins 917
Cystine
cachexia and 84
in muscle wasting 1077
Cytochrome P450
aromatase, expression of, alternative promoter usage in 29
sulfotransferase regulation in 109
Cytokine gene transcription: negative regulation of 825
Cytosolic sulfotransferases
changing views of 1
enzymology of 206
molecular biology of 3
Cytotoxic drug resistance gene transfer: in hematological cancers 640

Daunorubicin: apoptosis and, serine protease inhibitors and 695
Dead-end elimination: in peptide binding to proteins with flexible side chains 164
Dehydroepiandrosterone sulfotransferase 206
Deubiquitinating enzymes 1245
Dexamethasone: classically conditioned changes in plasma cortisol levels and 1291
Diabetes mellitus: sulfotransferase regulation in 109
Diadenosine polyphosphate: transport of from adrenal medulla to chromaffin granules 981
Disintegrin-like protein: in cultured human cells and in vivo 173
mtDNA: age-related changes in, caloric restriction and 573
DNA damage and repair: aging and 322
cDNA: of cytosolic sulfotransferases 3
DNA vaccines 753
Docking algorithm: for peptide binding to proteins with flexible side chains 164
Doxorubicin: cardiotoxicity of, pathophysiology and prevention of 931
Dubin-Johnson syndrome 509

E2 superfamily: in ubiquitin conjugation 1257
Ecstasy (MDMA): serotonergic cell death and 141
Ectonucleotidases: bile canalicular membrane function and 101
Elderly: health status of, monitoring changes in 923
Electromagnetic fields: carcinogenicity of 1127
Electrophoresis: sodium dodecyl sulfate-polyacrylamide gel, in resolution of mRNA and its protein 1153
Electrospray ionization mass spectrometry: of β-amyloid peptide 817
Endopeptidase 24.11: in phorbol ester–induced growth arrest in Jurkat T cells 869
Endoplasmic reticulum
$[Ca^{2+}]$ in, measurement of 881
degradation of, ubiquitination in 1227
Endothelian-converting enzymes 355
Endothelian receptor subtypes: seminiferous tubule contractility and 276
Endotoxemia: leukocyte recruitment in, nitric oxide regulation of 955
Enzymatic targets: chemical arrows for 217
Enzymology: of cytosolic sulfotransferases 206
Epinephrine: cardiac glycogen turnover and glucose uptake and 973
Epitopes: helical, determination of by combinatorial peptide library screening 147
17β-Estradiol: in myocardial ischemia, nitric oxide induction and K^+ channel activation in 793
Estrogen: biosynthesis of, alternative promoter usage in 29
Estrogen sulfotransferase 206
ET_A and ET_B endothelian receptor subtypes: seminiferous tubule contractility and 276
Ethanol: in down-regulation of microsomal triglyceride transfer protein gene transcription 1145
Eukaryotic 20S proteasomes: biogenesis of 1235
Excitatory amino acid transporter activity: effect of oxidative stress and 154
Experimental Biology '97: symposia 294
Extracellular matrix: in growth factor signaling 51

Ferredoxin $NADP^+$ reductases 133
Fibroblast growth factor: in extracellular matrix 51
Fibrosclerosis: 4-hydroxy-2,3-noneal up-regulation of transforming growth factor β1 and 851
FK506: in inhibition of thyroid hormone–induced apoptosis 559
Flavonol sulfotransferase family: plant, biochemistry and molecular biology of 517
Flavoprotein biogenesis: plant-type ferredoxin $NADP^+$ reductases and 133
Flippase: mdr2 P-glycoprotein as 19
Free radicals. *See also* Oxidative stress
aging and 322
in signal transduction 118

G_1 protein: in mitosis but not DNA synthesis 189
Gallic acid: plant, biochemistry and molecular biology of 517
Gamma radiation: latent activation of transforming growth factor β1 after 991
Gating: fluctuations in, due to changes in ion concentration vs. mobility 600
Gene structure: of cytosolic sulfotransferases 3
Gene therapy
adenoviral vectors in
advances in 615
chimeric 624
for neonates 635
retroviral vectors in, chimeric 624
Genetic engineering: in Germany 505
Genetic immunization 753
Gene transcription: cytokine, negative regulation of 825
Genomic imprinting: in liver carcinogenesis 60
Germany: biotechnology in 505
Giant elastic protein of muscle: structure and function of 34
Glial cells: kainate-triggered Ca^{2+} signaling in, Na^+/Ca^{2+} exchanger and 566
Glucose-6-phosphate: in glycogen synthase 544
Glucose tolerance: GLUT4 and hexokinase II overexpression and 1137
Glucose uptake: cardiac, epinephrine and 973
Glucosinolate: biochemistry and molecular biology of 517
GLUT4: overexpression of, glucose tolerance and insulin action and 1137
Glutamate dehydrogenase: in affinity labeling 217
Glutamine transport: in muscle cells, phosphatidylinositol 3-kinase in 1111
Glutathione homeostasis: melatonin maintenance of, kainic acid and 1309

Glutathione: in muscle wasting diseases 1077
Glutathione *S*-transferase: in affinity cleavage 217
Glycerolipids: in cellular signaling 45
Glycogen synthase: glucose-6-phosphate in 544
Glycogen turnover: cardiac, epinephrine and 973
Government funding
for biomedical research
in Germany 505
in U.S. 305
crisis in morale and 725
G-protein–coupled receptors 346
Growth factor signaling: extracellular matrix in 51
Growth hormone: in sulfotransferase regulation 109
Growth plate dysfunction: molecular basis of 125

Health care
continuing innovations in 398
for research animals 609
Heart failure
17β-estradiol in, nitric oxide induction and K^+ channel activation in 793
Adriamycin-induced, pathophysiology and prevention of 931
Heart: glycogen turnover and glucose uptake in, epinephrine and 973
Heart muscle model: three-dimensional 683
Heart protein kinase C: decrease in, in perinatal asphyxia 482
Helical epitopes: determination of, by combinatorial peptide library screening 147
Hematological malignancies: gene therapy for 640
Hematopoietic cytokine receptor signal transduction: serine/threonine phosphorylation in 37
Hematopoietic stem cells: gene marking of 640
Heparan sulfate: growth factor binding to 51
Hepatic carcinogenesis: genomic imprinting in 60
Hepatic expression: of multidrug resistance genes 308
Hepatobiliary lipid transport: mdr2 P-glycoprotein in 19
Hepatocellular carcinoma
genomic imprinting in 60
multidrug resistance in 308
p53 deficiency and 591
Hepatocyte canalicular membrane 101
bile acid transport across 19
conjugate export pump in 509
ectonucleotidases and purine nucleodise transporter in 101
lipid transport across 101
mdr2 P-glycoprotein in 19
mdr2 P-glycoprotein in 19
transport across 15
conjugate export pump in 509
Hereditary skeletal disorders
matrix component abnormalities and 227
transcription factors and signaling pathways in 125
Hexokinase II: overexpression of, glucose tolerance and insulin action and 1137
Hill equation 835
HIV infection. *See* Human immunodeficiency virus (HIV) infection
Homocysteine signal cascade: phospholipid production, protein kinase C activation and c-fos/c-myb induction in smooth muscle and 703
Homocystinuria: atherosclerosis and 703
Human immunodeficiency virus (HIV) infection
cachexia in, plasma cystine levels and 84
gene therapy for, in neonates 635
muscle wasting in, cysteine and glutathione in 1077
Hydrogen peroxide
aldose reductase induction and 181
mitochondrial generation of 1269
uncoupling protein-2 in 809
4-Hydroxy-2,3-noneal: up-regulation of transforming growth factor β1 by, fibroslcerosis and 851
4-Hydroxy-2,3-*trans*-noneal (HNE): aldose reductase induction and 181
Hydroxyl radical: liver methionine adenyosyltransferase interaction with 1013
Hyperhomocysteinemia: in thrombogenesis 1157
Hypothalamic-pituitary-adrenal axis: in classical conditioning 1291

IGF2: in liver carcinogenesis 60
IgG: human chagasic, interaction of with heart muscarinic acetylcholine receptor 77
Immunogenicity: D-amino acids and 449
Immunotherapy: DNA vaccines in 753
Imprinted genes: in liver carcinogenesis 60
Inflammation
chronic, angiogenesis and 457
leukocyte recruitment in, nitric oxide regulation of 955
Inositol 1,4,5-triphosphate–induced Ca^{2+} release: in HeLa cells, $[Ca^{2+}]$ microdomains and 881
Insulin: GLUT4 and hexokinase II overexpression and 1137
Insulin-like growth factor: in liver carcinogenesis 60
Integrins: tetraspanins and 428
Interferon-inducible protein 10: and lymphotactin, chemotaxis and calcium mobilization in natural killer cells and 765
2-[^{125}I]Iodomelatonin binding site: for Mel_{1a} receptor 93
Ion current: fluctuations in, due to changes in ion concentration vs. mobility 600
IQ motif: for calmodulin recognition 331
Irradiation: latent activation of transforming growth factor β1 after 991
Ischemic heart failure: 17β-estradiol in, nitric oxide induction and K^+ channel activation in 793
Isocitrate dehydrogenase: in affinity cleavage 217

Jurkat T cells: phorbol ester–induced growth arrest in, endopeptidase 24.11 and 869

Kainate-triggered Ca^{2+} signaling: in Bergmann glial cells, Na^+/Ca^{2+} exchanger and 566
Kainic acid: glutathione homeostasis and 1309
K^+ channel activation: in myocardial ischmia, 17β-estradiol and 793
KELL 355
Kinase: cyclin-dependent, decrease in, in perinatal asphyxia 482

Lactococcal endopeptidase 355
Lectins: sialic acid binding 248
Leptin gene expression: in rat adipose tissue at birth 382
Leukemia: gene therapy for 640
Leukocyte recruitment: in sepsis, nitric oxide regulation of 955
Life sciences: crisis in morale in 725
Ligand binding: Hill equation for 835
Lipids: in cell signaling 45
Lipid transport
across canalicular membrane, mdr2 P-glycoprotein in 19
hepatobiliary, mdr2 P-glycoprotein in 19
Liver cancer
multidrug resistance in 308
p53 deficiency and 591
Liver carcinogenesis: genomic imprinting in 60
Liver methionine adenyosyltransferase: interaction of with hydroxyl radical 1013
Liver: multidrug resistance gene expression in 308
Longevity. *See also* Aging
CD4 memory T cells and 775
Low CG syndrome 1077
Low-density lipoproteins: oxidative stress from, in atherosclerosis 1317
L-type calcium channel currents: protein tyrosine kinase and 859
Lymphocytes: T and B, Mel_{1a}-melatonin receptor mRNA in 466
Lymphoma: gene therapy for 640
Lymphotactin: interferon-inducible protein 10 and, chemotaxis and calcium mobilization in natural killer cells and 765

M6P/IGF2R: imprinting of, liver carcinogenesis and 60
Macrophages: induction of mitochondrial manganese superoxide dismutase in, by low-density lipoproteins 1317
Magnetic fields: carcinogenicity of 1127
Manganese superoxide dismutase: mitochondrial, induction of by low-density lipoproteins 1317
Mannose 6-phosphate/insulin-like growth factor: imprinting of, liver carcinogenesis and 60
Mass spectrometry: electrospray ionization, of β-amyloid peptide 817
MDC 15: in atherosclerosis 173
MDMA (Ecstasy): serotonergic cell death and 141
MDR1/MDR2: hepatic expression of 308
mdr2 P-glycoprotein
in hepatobiliary lipid transport 19
lipid transport across bile canalicular membrane and 19
Mel_{1a}-melatonin receptor mRNA: in T and B cells 466
Melatonin
excitatory amino acid transporter activity and 154
in glutathione homeostasis, kainic acid and 1309
renal action of, Mel_{1a} receptor and 93
Membrane metallopeptidases 355
Memory cells: CD4, longevity and 775
Metastasis: in breast cancer, bcl-2 overexpression and 947
Microsomal triglyceride transfer protein gene transcription: ethanol down-regulation of 1145
Mitchondrial enzyme abnormalities: age-related muscle, caloric restriction and 573
Mitochondria
generation of superoxide anion radicals and hydrogen peroxide in 1269
superoxide anions in 374
Mitochondrial hydrogen peroxide generation: uncoupling protein-2 in 809
Mitochondrial manganese superoxide dismutase: induction of by low-density lipoproteins 1317
Mitosis: G_1 protein regulation of 189
Modern biochemistry: centennial of 1209

Molecular biology: crisis in morale in 725
Molecular regulation: of cytosolic sulfotransferases 3
Monoamine-sulfating sulfotransferase 206
Monoclonal antibodies: in combinatorial peptide library screening 147
Morale: crisis in 725
Multidrug resistance genes: hepatic expression of 308
Multiple myeloma: gene therapy for 640
Muscarinic acetylcholine receptor: IgG interaction with, in chagasic cardiomyopathy 77
Muscle: age-related changes in, caloric restriction and 573
Muscle cells: amino acid transport in, phosphatidylinositol 3-kinase in 1111
Muscle wasting diseases: cysteine and glutathione in 1077
Mutagens: bioactivation of via sulfation 314
Myeloma: gene therapy for 640
Myocardial ischemia: 17β-estradiol in, nitric oxide induction and K^+ channel activation in 793

Na^+/Ca^{2+} exchanger: in calcium homeostasis in Bergmann glial cells 566
Natural killer cells: chemotaxis and calcium mobilization in, interferon-inducible protein 10 and lymphotactin induction of 765
Neonates: gene therapy for 635
Neutral endopeptidase-24 355
Neutrophilic apoptosis: β_2 integrins in 1177
Nitric oxide
in leukocyte recruitment in sepsis 955
in myocardial ischmia, 17β-estradiol and 793
p53 and, in carcinogenesis and tumor progression 443
Nitric oxide-mediated apoptosis: cyclooxygenase-2 in 887
Nonsteroidal anti-inflammatory drugs: in colon cancer prophylaxis, prostaglandin H synthase and 234

Obesity
genetics of 743, 937
tumor necrosis factor in 743, 937
Ornithine decarboxylase: targeting of to 26S proteasome 1055
Osteoblasts: mRNA expression in, vibrational force altering 493
Osteochondrodysplasias
matrix component abnormalities and 125
transcription factors and signaling pathways in 125
Osteoclasts: stem cell factor stimulation of 287
Oxidative stress
Adriamycin cardiotoxicity and 931
aerobic glycolysis by proliferating cells in protection against 388
aging and 322
aldose reductase induction and 181
excitatory amino acid transporter activity and 154
fibrosclerosis and 851
melatonin protective effects on 1309
perinatal, decreased heart protein kinase C and cyclin-dependent kinase in 482
Oxidized proteins: degradation of, in mammalian cells 526

p53
calibrated quantitative PCR for 897
deficiency of, hepatocellular carcinogenesis and 591
nitric oxide and, in carcinogenesis and tumor progression 443
p80: in cellular proliferation and oncogene up-regulation in rat fibroblasts 965
P450: sulfotransferase regulation in 109
Paraquat: actin polymerization and 261
Peptide binding: to proteins with flexible side chains, computation of 164
Perinatal asphyxia: decreased heart protein kinase C and cyclin-dependent kinase in 482
Peroxynitrite: in tyrosine-dependent signal transduction in erythrocyte band 3 1281
Pertussis toxin–sensitive G-protein: Mel_{1a} receptor and 93
Pesticides: carcinogenic, misconceptions about 1041
PEX 355
P-glycoprotein
in hepatobiliary lipid transport 19
multidrug resistance gene expression in liver and 308
Phage display library: in determination of helical epitopes 147
Phenol sulfotransferases 206
Phorbol ester–induced growth arrest: in Jurkat T cells, endopeptidase 24.11 and 869
Phosphatidylinositol 3-kinase: in amino acid transport in muscle cells 1111
3′-Phosphoadenosine 5′-phosphosulfate: in sulfate regulation 404
Phospholipid flippase: mdr2 P-glycoprotein as 19
Phospholipids: production of, homocysteine and 703
Plant sulfotransferases: biochemistry and molecular biology of 517
Plant-type ferredoxin $NADP^+$ reductases 133
Plasma cortisol levels: classically conditioned changes in, dexamethasone and 1291
Plasma membrane proteins: ubiquitin-dependent internalization and down-regulation of 1215
Platelet-derived growth factor: in vascular development 365
Platelet-derived growth factor receptor: in inhibition of vascular smooth muscle cell migration and proliferation 1119
Pollutants: carcinogenic, misconceptions about 1041
Polymerase chain reaction: calibrated quantitative, target length and primer concentration in 879
Polypeptide growth factors: in vascular development 365
Potassium channel activation: in myocardial ischmia, 17β-estradiol and 793
Probucol: for Adriamycin cardiotoxicity 931
Prodrug enzyme transfer: for hematological malignancies 640
Prolactin: androgen-dependent expression of in prostate epithelium 1297
Prostaglandin H synthase: NSAIDs prophylaxis for colon cancer and 234
Prostate epithelium: androgen-dependent prolactin expression in 1297
Proteasome complex: in degradation of oxidized proteins 526
Protein kinase C
activation of
hematopoietic cytokine receptors in 37
homocysteine and 703
cardiac, decrease in, in perinatal asphyxia 482
diacylglycerol regulation of 45
isoenzyme-selective modulation of 649
L-type calcium channel currents and 859
Protein kinase II: calmodulin-dependent, in signal transduction in apoptosis 843
Proteins
with flexible side chains, computation of peptide binding to 164
oxidized, degradation of, in mammalian cells 526
Protein tyrosine kinase: L-type calcium channel currents and 859
P-selectin: up-regulation of in traumatic shock 1271
Purine nucleoside transporter: bile canalicular membrane function and 101

Quantitative polymerase chain reaction: target length and primer concentration in 879

Radiation: latent activation of transforming growth factor β1 after 991
Raf-1 kinase: lipid regulation of 45
Research animals: health care for 609
Retina: arrestin mRNA in, retinoic acid regulation of 271
Retinal pigment epithelial cells: L-type calcium channels in, protein tyrosine kinase and protein kinase C regulation of 859
Retinoic acid
arrestin mRNA regulation by 271
in vascular smooth muscle differentiation 905
Retroviral vectors: chimeric 624
Rheumatoid arthritis: angiogenesis and 457
mRNA: osteoblastic, alteration of by vibrational force 493

Saccharomyces cerevisiae: ecological adaptation of 917
Saporin: cytotoxicity of 1169
Scientific morale: crisis in 725
Second messengers: glycerolipid and sphingolipid–derived 45
Seminiferous tubule contractility: ET_A and ET_B endothelian receptor subtype regulation of 276
Senescence: DNA damage and repair and 322
Sepsis: leukocyte recruitment in, nitric oxide regulation of 955
Serine protease inhibitors: daunorubicin-triggered apoptosis and 695
Serine/threonine phosphorylation: in hematopoietic cytokine receptor signal transduction 37
Serotonergic cells: programmed death of, by Ecstasy (MDMA) 141
17th International Congress of Biochemistry and Molecular Biology: symposia 712
Severe combined immunodeficiency: gene therapy for, in neonates 635
Shock: traumatic, P-selectin up-regulation in 1271
Sialic acid binding lectins 248
Signaling
growth factor, extracellular matrix in 51
sphingolipids and glycerolipids in 45
Signal transduction
in apoptosis, calmodulin-dependent protein kinase II mediation of 843
free radicals and derived species in 118
Skeletal disorders: hereditary
matrix component abnormalities and 227
transcription factors and signaling pathways in 125
Small peptide hormones: chimeric analogs of, design strategies for 582
Sodium/calcium exchanger: in calcium homeostasis in Bergmann glial cells 566
Sodium dodecyl sulfate-polyacrylamide gel electrophoresis: in resolution of mRNA and its protein 1153
Sperm: membrane stability and acrosome reaction in 670
Sphingolipids: in cellular signaling 45
STATS: phosphorylation of, serine/threonine kinases in 37
Stem cell factor: osteoclast stimulation by 287
Steroid hydroxylase genes: ACTH-dependent transcription of 419
Sulfate conjugation: cytosolic sulfotransferases and 3

Sulfate: *S. cerevisiae* uptake of 917
Sulfation
changing views of 1
of cytosolic sulfotransferases 3
mutagen bioactivation via 314
3′-phosphoadenosine 5′-phosphosulfate regulation of 404
Sulfonation: of cytosolic sulfotransferases 3
Sulfotransferases
cytosolic
changing views of 1
enzymology of 206
molecular biology of 3
regulation of 109
plant, biochemistry and molecular biology of 517
Superoxide anion radicals: mitochondrial generation of 1269
Superoxide anions: mitochondrial 374
Systemic lupus erythematosus: anti-DNA antibodies in 1033

T_3 (triiodothyronine): *Bax*-dependent pathways for apoptosis and 801
T cells
CD4 memory, longevity and 775
Mel_{1a}-melatonin receptor mRNA in 466
phorbol ester–induced growth arrest in, endopeptidase 24.11 and 869
Tetraspanin superfamily: as molecular facilitators 428
Thermogenesis: tumor necrosis factor and 743
Thermolysin 355
Thrombogenesis: hyperhomocysteinemia in 1157
Thymic development: CD10 in 376, 1003
Thymosin β_4: in migration of umbilical vein endothelial cells 474
Thyroid hormone: *Bax*-dependent pathways for apoptosis and 801
Thyroid hormone–induced apoptosis: inhibition of by cyclosporin A but not FK506 559
TM4SF superfamily: as molecular facilitators 428
Transcription: cytokine, negative regulation of 825
Transcription factors: in hereditary skeletal disorders 125
Transforming growth factor-β
in extracellular matrix 51
in vascular development 365
Transforming growth factor-β1: latent activation of after gamma radiation 991
Transmembrane 4 superfamily: as molecular facilitators 428
Traumatic shock: P-selectin up-regulation in 1271
Triiodothyronine (T_3): *Bax*-dependent pathways for apoptosis and 801
Trypanosomiasis: African, S-adenyosylmethionine transporter in 256

Tumor necrosis factor
cachexia and 743
obesity and 743, 937
Tumor suppressor gene: *M6P/IGF2R* as 60
Tumor vaccines: for hematological malignancies 640
20S proteasome: biogenesis of 1235
26S proteasome: targeting of substrates to 1055
Tyrosine-dependent signal transduction: in erythrocyte band 3, peroxynitrite in 1281
Tyrosine kinase: in inhibition of vascular smooth muscle cell migration and proliferation 1119
Tyrosine phosphorylation: hematopoietic cytokine receptors in 37

Ubiquitin
in cellular regulation 1053, 1067
conjugative pathways for 1257
Ubiquitination
deubiquitinating enzyme regulation of 1245
in endoplasmic reticulum degradation 1227
of plasma membrane proteins 1215
targeting of substrates to 26S proteasome and 1055
Umbilical cord blood cells: in neonatal gene therapy 635
Umbilical vein endothelial cells: thymosin β_4 in 474
Uncoupling protein-2: in mitochondrial hydrogen peroxide generation 809
Urokinase: amino-terminal fragment of, cytotoxicity of 1169

Vaccines
DNA 753
tumor, for hematological malignancies 640
Vascular endothelial growth factor
in regulation of vascular endothelial and smooth muscle cells 498
in vascular development 365
Vascular smooth muscle differentiation: db-cAMP and retinoic acid in 905
Vasculogensis: cellular and molecular regulation in 365
Vasopressin: chimeric analogs of, design strategies for 582
Vectors
adenoviral
advances in 615
chimeric 624
retroviral, chimeric 624
VEGF-2: in regulation of vascular endothelial and smooth muscle cells 498
Vibrational force: alterations in mRNA expression in osteoblasts and 493
Virus capsid assembly: symmetry in 733
